It took around 6 weeks but my new MRD Shorty exhaust arrived. Loud does not even come close to the right word to describe it, even with the quite insert installed it is a lot louder than my old DEP System 3 exhaust, the build quality is 10/10 the performance is still to be tested I have only gone down the road and back but it does seem to sit on 110 a lot easier I will give an update once I get it in the bush.
